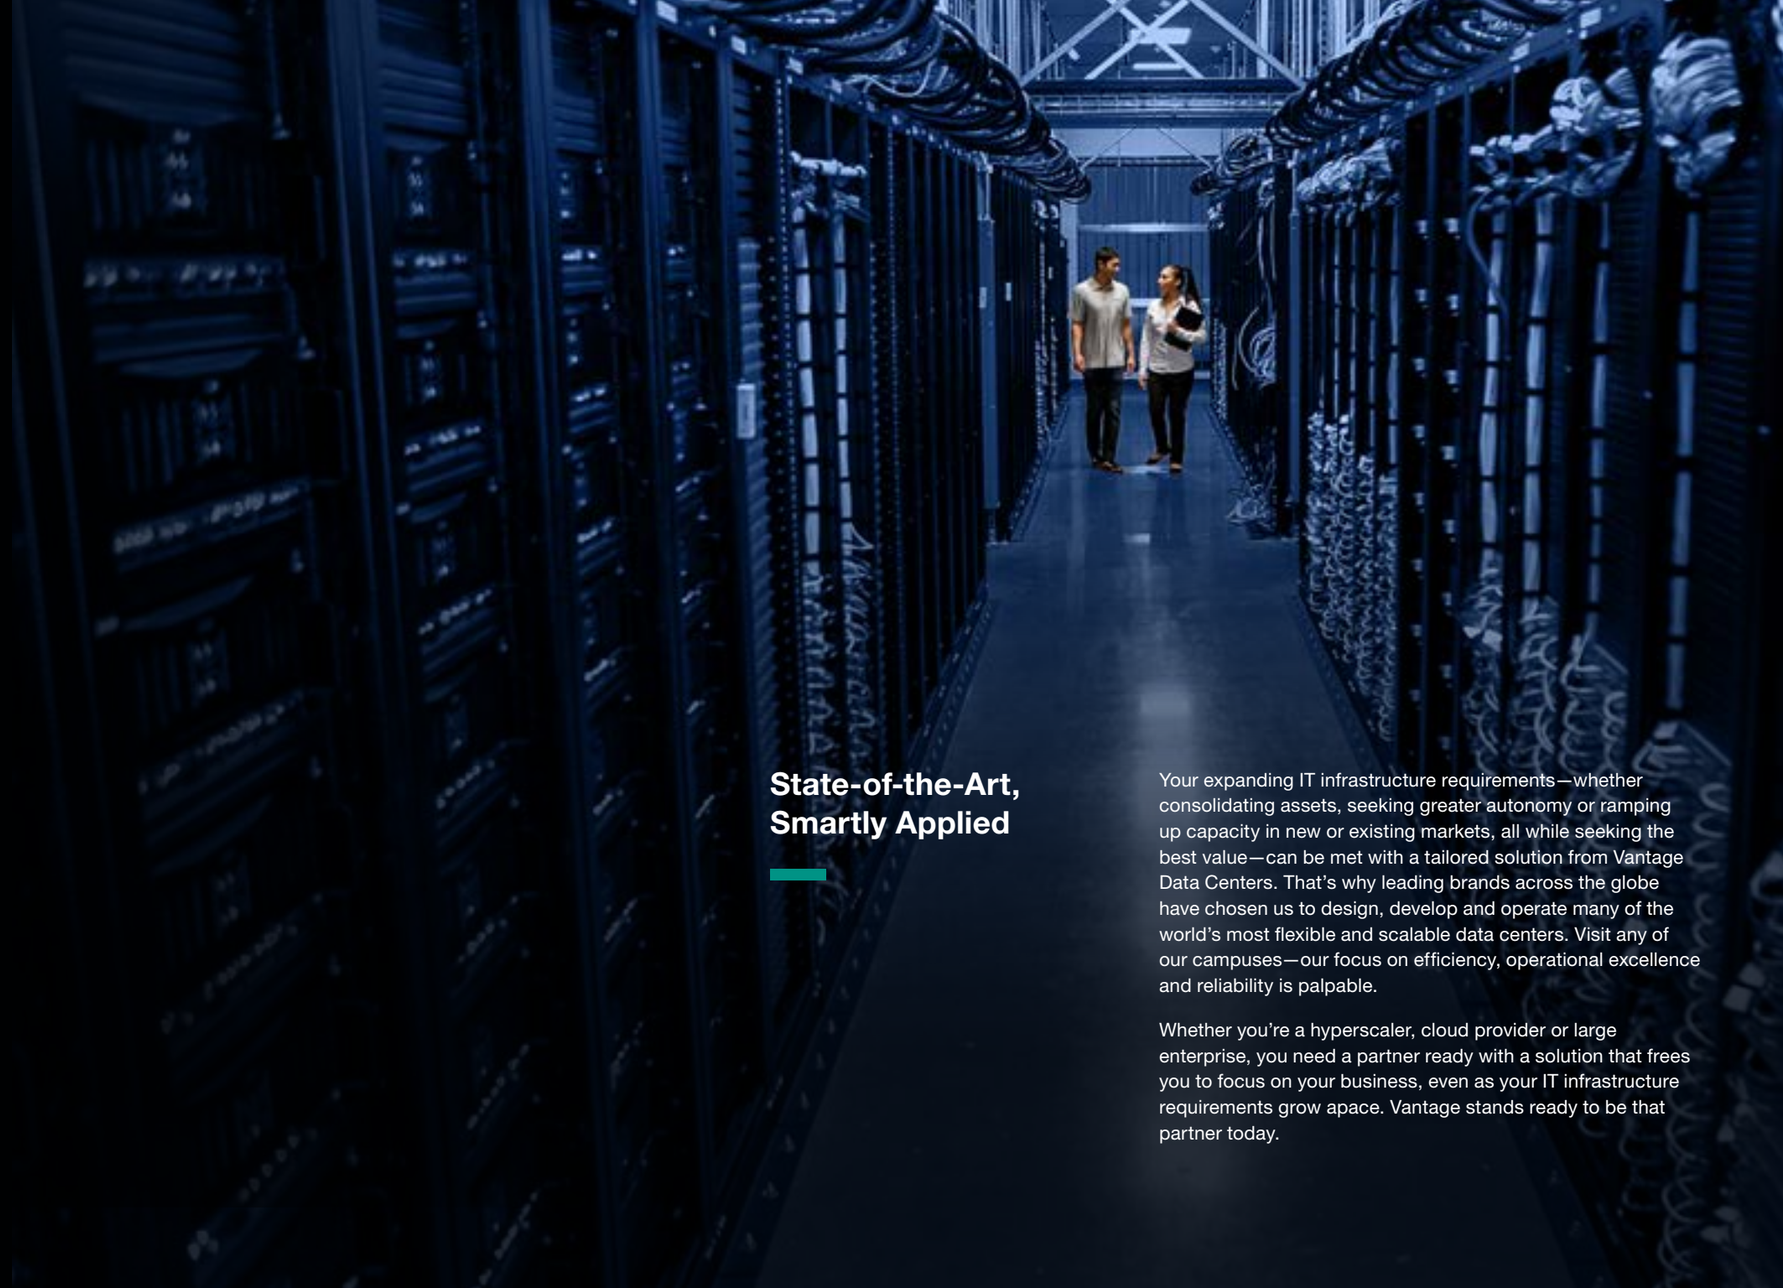
READY
VANTAGE™
DATA CENTERS



State-of-the-Art, Smartly Applied

Your expanding IT infrastructure requirements—whether consolidating assets, seeking greater autonomy or ramping up capacity in new or existing markets, all while seeking the best value—can be met with a tailored solution from Vantage Data Centers. That's why leading brands across the globe have chosen us to design, develop and operate many of the world's most flexible and scalable data centers. Visit any of our campuses—our focus on efficiency, operational excellence and reliability is palpable.

Whether you're a hyperscaler, cloud provider or large enterprise, you need a partner ready with a solution that frees you to focus on your business, even as your IT infrastructure requirements grow apace. Vantage stands ready to be that partner today.

ALL TO MAKE YOUR BUSINESS BETTER

You need to advance your business strategies with confidence. That's why at Vantage, we've adopted a forward-looking model created especially for the ongoing tech revolution. With AI, high-performance computing and machine learning about to make Moore's Law look quaint, we took what we've been doing well for over a decade and set out to expand, standardize and replicate it so we'd be ready for your growth.

SCALE

We build large-scale campuses (64 to 150+MW) to enable our customers to grow in place over the long term.

EFFICIENCY

Our standardized, flexible designs provide predictability, efficiency and non-stop performance—all supported by a world-class, highly-responsive and transparent operations team. The result is not just a lower total cost of ownership, but peace of mind with a partner you can trust.

SPEED-TO-MARKET

Our proven campus models support your expansion plans with accelerated time-to-market, delivering whitespace in six months or less.

FINANCIAL STRENGTH

We are backed by a consortium of investors, including Colony Capital Inc., Digital Colony and PSP Investments. You can rest assured knowing Vantage has the resources and capital to grow and scale with you as needed.

GO [CON]FIGURE

The buildings are just the beginning. The technology and infrastructure choices that surround them, and the people who stand behind them, are the real story. It's a story that our customers—from Fortune 100 companies to high-growth enterprises across various industries—have enjoyed firsthand, thanks to a foundation of transparency and unwavering support. Whichever Vantage Data Centers service you choose, you'll receive timely and ongoing support that helps you move your business forward.

Wherever you want to be.

In more places today with more space, more power and more efficiency, we're ready to help you navigate rapid changes in today's business world. We've located our campuses in some of the most strategic sites across the globe, including tech hubs in the U.S. and Canada, as well as Tier I and Tier II markets across Europe.

Unwavering support, whether you're on-site or off.

We offer supporting fit-out services that prepare you for any eventuality. Need electrical distribution installed? Need your office space built out? We'll work with you to create the perfect environment to support your data module and on-site needs.

RACK READY

With breakers and outlets in place, rack ready spaces are the most turnkey of turnkey solutions. Simply load your equipment into your secure space, make your network connections, and you're up and running in no time. Of course, we're here throughout to answer any questions and provide support where needed.

WHITESPACE

Providing wholesale capacity for your critical IT infrastructure, our data modules are ready for you to configure as you want. You control the location and installation of breakers, outlets and network connections, all to match your vision of the most efficient use of space.

BUILD-TO-SUIT

Have designs that feature brand new and out-of-the-box ways to power, cool, connect or maintain? We'll work with you to build a truly custom data center that meets your capacity requirements and unique needs.

THE BASICS DONE BETTER. ALL WHILE RAISING THE BAR FOR NEW STANDARDS

You deserve a data center partner ready to ensure your technology and applications are powered, cooled, protected and connected, when and how you want them. We've standardized our campuses to reliably deliver all of the above, while remaining flexible enough to meet your specific needs.

POWER

Vantage offers you 1GW of critical IT capacity with N+1 redundancy across all systems for uninterrupted operations; you can choose from flexible densities within your data modules. We seek green power sources wherever possible, while delivering an industry leading PUE of <1.3.

COOLING

Our choice of air-cooled chillers in a closed-loop system not only saves a precious resource—water—but reduces energy use as well, all while delivering unequaled efficiency. The result is an advanced cooling system with N+2 redundancy across our data centers, designed to be climate-independent and environmentally responsible.

CONNECTIVITY

Partnering with more than 25 carriers, we are carrier-neutral and offer both lit and dark fiber to enable you to best manage your network. Each campus has a minimum of three points-of-entry with diverse pathways into a facility and into your data module for both resiliency and redundancy.

SECURITY & COMPLIANCE

Our rigorous policies meet or exceed industry standards. A visitor management system, 24-hour on-site security patrols, access badges, biometric dual authentication and video monitoring are standard. Before accessing the main data center area, all personnel pass through a tiered security zone architecture only after satisfying increasing levels of authorization. We stand ready to add additional measures around your data modules as needed.

A multitude of certifications offer proof of our commitment to helping you achieve your compliance and audit requirements.

ROOM DESIGN

We have a proven record of supporting high-density compute up to 300 watts per square foot. Focused on providing maximum flexibility in data module configuration, we offer both slab and raised floor options, 12' 6" clearance ceiling heights, lighting adaptable to your rack placement and multiple options for fire protection.

AMENITIES

We make sure you'll have all you need to function efficiently and effectively, from striking and uncommon common areas to the flexibility to create the perfect work space exclusively for your personnel. The office, meeting and storage spaces you need for your equipment and personnel are available, as well as well-stocked kitchens and break rooms just for relaxing.

SUSTAINABILITY

From seeking renewable power sources wherever possible to zero water waste, from solar generation of non-critical power for office lighting to electric vehicle charging stations and on-site recycling, we share your commitment to environmental responsibility.

OPERATIONAL EXCELLENCE

Our processes and technologies are not simply written into an SLA, but practiced with rigor by Vantage personnel at every level of responsibility. This uncompromising adherence to proven protocols provides the same experience across the globe, with on-site teams fully certified to perform ongoing and preventive maintenance for nonstop performance.

SUPPORTING THE ONGOING TECH REVOLUTION—

DRIVEN BY YOU

Ready to help you change the world.

By empowering our clients' businesses, we're helping people connect all across the world; meet virtually, whether as co-workers or family; start and run businesses; fully enjoy new technologies; safely archive photos and documents that are truly priceless or simply irreplaceable to one person.

Recognizing our role in enabling all of the above, we've evolved a replicable and scalable blueprint for bringing together the elements needed to serve the most demanding customers. Focusing on scale, speed-to-market, efficiency, sustainability and operational excellence, we employ our blueprint to ensure your success, and the success of our partnership. When you don't have to think about how your data center is running, you can focus on taking your business to the next level.

When you want to reduce capital expenses, or when your business needs streamlined, efficient expansion, we're ready. When you come to the planning table, we're ready to be your partner with actionable solutions. And when transparency and predictability are must-haves, we're ready with the technology and operating principles to help you sleep well at night.
